

Learning **I**FEarning

Whether you are starting the college, or waiting to get into a college, or about to complete academic education, a question always comes to mind "what lies ahead".

Life Learning Earning program will not only help you find the answer to this question but will also help you prepare to face the challenges that your answer will demand.

ROAD MAP OF YOUR TOMORROW

WHAT WILL YOU GAIN

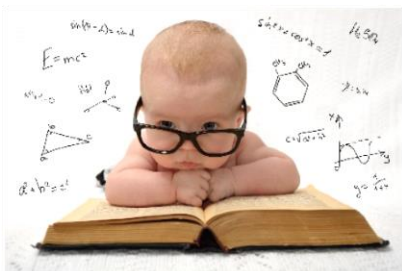

Life

It is the only one that we have got and making the best out of this opportunity requires to understand it. "Even the best ship with the best captain will be lost if not knowing where it should head to."

This program will open the visage of life to help you find your direction.

Learning

Men is the only animal that does not know

even to breath as it is born. We must learn everything including why to learn, what to learn and how to learn.

This program will help you with the right attitude and methods to maximize your learning potential.

Earning

Knowledge gained through academic learning is of no consequence unless it helps us create value for the society for which the society is willing to pay.

Though understanding life & learning diligently are pre-requisite for learning, these alone are not sufficient.

LearningIFEarning is a series of programme. This program will prepare you with the skills required to get into an earning position and excel in your chosen endeavour.
