

# Family is the first school

We want our children to be doctors, engineers, lawyers and leaders. School will help us to do it. But what type of a doctor, engineer, lawyer or leader, the child will be? Therein lies the responsibility of parents.

This training workshop is intended to give a new perspective to parents own up their role in their child's upbringing & help them collaborate with the school for creating a positive influence.

## Contents

### Role model

Every word, facial expression, gesture, or action on the part of a parent gives the child some message about self-worth. It is sad that so many parents don't realize what messages they are sending.

### Encouragement

If you raise your children to feel that they can accomplish any goal or task they decide upon, you will have succeeded as a parent and you will have given your children the greatest of all blessings.

The love of a parent for a child is continuous and transcends heartbreak and disappointment. You want to be a good parent and you want to be a friend, and it's hard to be both. You must balance it as well as you can.

### Responsibility

You cannot abdicate your responsibility to school. It is the parent's job to see how their child learns and to make sure that the children's self-confidence is buoyed at all times, or they will plummet like a stone.

The best inheritance a parent can give his children is a few minutes of his time each day.

## Take Away

Following this programme, the parents will appreciate their responsibility towards their child with a wider perspective & will be encouraged to collaborate with school to develop their child.

To benefit from this training workshop as an organization or, an individual or, a group, please [contact us](#).

## Objectives

- Be a role model
- Be an encourager
- Take responsibility

## Who should attend?

Parents

## What is the duration?

4 Hours
